1. What are Cookies and Similar Technologies?

1. Cookies are small text files stored on your device. Similar technologies include in particular local storage, session storage, pixels, SDKs, device and browser identifiers, fingerprinting methods and counting technologies used in e-mails.
2. This policy describes which of these technologies we use, for what purposes, on what legal basis, for how long, and how you can give, refuse or withdraw your consent.
3. It supplements our Privacy Policy, which describes the remaining processing of personal data.

2. Controller

The controller is Online 3D Drucken e.U., Nißlstraße 24, 4040 Linz, Austria, e-mail for data protection enquiries: info@online-3d-drucken.at.

Further details on the controller and the remaining data processing can be found in our Privacy Policy and in the Impressum, both published at online-3d-drucken.at/agb.

3. Legal Bases

1. Storing information on your device and accessing information already stored are permitted under § 165(3) TKG 2021 only with your consent.
2. No consent is required where the storage or access serves solely to transmit a message over a communications network, or is strictly necessary for us to provide a service expressly requested by you.
3. The GDPR and the Austrian Data Protection Act (DSG) additionally apply to the subsequent processing of personal data. For technologies requiring consent, the legal basis is Art. 6(1)(a) GDPR; for technically necessary technologies it is Art. 6(1)(f) GDPR (functioning and secure website) or Art. 6(1)(b) GDPR.
4. The legal assessment is two-stage: first § 165 TKG 2021 for access to the device, then the GDPR for the data processing. A legitimate interest under the GDPR does not replace consent under § 165 TKG 2021.

4. Technically Necessary Technologies

1. These technologies are required for the website and the ordering process to function. They are used without consent.
2. They typically include: storage of the shopping basket, login session, security and attack protection, load balancing, continuation of the payment session, storage of your cookie decision and a language setting actively chosen by you.
3. Necessity is construed narrowly: a technology is not necessary merely because it is useful, economical, convenient or pre-set in a plugin. For every technology used without consent we can explain why it is indispensable for the service you requested.

5. Preference Technologies

Preference technologies store settings you have chosen that go beyond what is technically necessary. Unless strictly necessary, we use them only after your consent.

Beyond storing your cookie decision and a language setting actively chosen by you, we currently use no separate preference technologies.

6. Reach Measurement (Analytics)

1. Cookies and similar technologies may be used for reach measurement. They are used exclusively after your consent. The technologies actually used in each case, together with their providers, purposes and storage periods, are set out in the cookie banner and in the cookie settings.
2. This may involve processing identifiers, pages accessed, events, approximate location based on the IP address, and device and browser data.
3. We do not assume that first-party analytics, IP truncation, a provider's "privacy mode" or server-side tracking automatically remove the requirement for consent.
4. As long as you have not consented, no analytics technologies are loaded.

7. Advertising and Profiling

1. We use advertising and retargeting technologies only after your consent. The technologies actually used in each case, together with their providers, purposes and storage periods, are set out in the cookie banner and in the cookie settings.
2. This may involve processing identifiers, usage behaviour and campaign data, and building profiles for advertising purposes. Any such advertising profiling takes place exclusively on the basis of your consent (Art. 6(1)(a) GDPR).
3. No advertising is directed specifically at children.
4. As long as you have not consented, no advertising technologies are loaded.

8. Embedded Services

1. Where we embed third-party content that transmits data to the provider before activation, we use it only after your consent.
2. This concerns in particular embedded third-party elements (for example review or advertising elements). The services embedded in each case, together with their providers and purposes, are set out in the cookie banner and in the cookie settings.
3. Without your consent these elements are not loaded; a notice with an activation option may be displayed in their place.

9. Overview of Technologies Used

The categories of technologies we use, together with their purposes, are described in sections 4 to 8.

The complete and always current list of the specific technologies used – including name, provider, purpose, category and storage period – can be viewed at any time via the cookie settings. As we operate the consent management ourselves, that list is kept up to date and reflects the technologies actually set.

10. Consent

1. We obtain your consent via a consent management banner that we operate ourselves. The first level offers equally accessible options: Accept all, Reject all and Settings.
2. Non-essential technologies are set only after your consent. Optional categories are not pre-selected.
3. Your consent is active, informed, specific, freely given, unambiguous and revocable. Merely continuing to browse or scrolling does not constitute consent.
4. Consent is not bundled with acceptance of the GTC.
5. For evidence purposes we store your selection, the categories chosen, the date and time, the version of the banner and policy, and a technical identifier.

11. Refusal and Withdrawal

1. You may refuse non-essential technologies without the basic functions of the shop being restricted.
2. You may change or withdraw your consent at any time with effect for the future via the permanently accessible cookie settings. Withdrawal ends future processing by the technologies concerned; the lawfulness of processing carried out until then is unaffected.
3. Refusal and withdrawal are not made more difficult than giving consent and do not require more steps.
4. You may also delete or block cookies via your browser settings. This may impair the functioning of the website.

12. Storage Periods

1. The storage period of each technology can be found in the cookie settings (section 9). Session-based technologies are deleted when the browser is closed; persistent technologies have the lifetime stated in each case.
2. Your consent is not permanent. We obtain it again where purposes or providers change, where new technologies requiring consent are added, where tracking becomes more intrusive, where the record of consent is no longer reliable, or where an appropriate period has elapsed.
3. We retain records of consent for as long as required to demonstrate compliance to the Data Protection Authority.

13. Recipients

Recipients of data processed via these technologies may include in particular providers of analytics and advertising technologies and providers of embedded third-party content. Which providers these are in each case is set out in the cookie settings. We operate the consent management ourselves; records of consent are stored on our own infrastructure.

Providers of advertising technologies and of embedded third-party content generally act as separate controllers under their own privacy notices. Agreements pursuant to Art. 28 GDPR are in place with processors. Details and the complete list of service providers used can be found in our Privacy Policy or on request at info@online-3d-drucken.at.

14. Transfers to Third Countries

Where data is transferred via these technologies to recipients outside the European Economic Area, we rely on an adequacy decision – in particular the EU-US Data Privacy Framework for certified recipients – or on the European Commission's Standard Contractual Clauses together with supplementary measures.

This may concern providers of analytics, advertising and embedding technologies requiring consent; which providers are concerned in each case is set out in the cookie settings. Further details, including the note on the proceedings pending before the Court of Justice of the European Union concerning the Data Privacy Framework, can be found in our Privacy Policy.

15. Cookie Settings

You can manage your consent at any time via the permanently available Cookie Settings control in the footer of our website.

There you can review the individual categories, change your selection, reject all optional technologies, and access the complete, current overview of the technologies used, including provider, purpose and storage period.

16. Updates to this Policy

We may adapt this Cookie and Tracking Policy where the technologies used, the providers or the legal requirements change. The current version published on the website applies in each case.

This policy is dated 3 August 2026 and applies to the web shop online-3d-drucken.at.

This is a convenience translation of the German-language Cookie- und Tracking-Richtlinie. In the event of any discrepancy, the German version prevails.
